## **IDEAVIT Solid Surface**

### **The Material**

---

**The IDEAVIT SolidSurface is a new generation Solid Surface Material .**  
**It is made of two-thirds natural mineral powder derived from bauxite (ATH – aluminium trihydrate) as main component and a low percentage of high-resistance resins, pigments and catalysts .**  
**This composition gives IDEAVIT SolidSurface a number of exclusive features:**  
**It does not have any pores, it is antibacterial without any type of additive, it is hard-wearing, highly resistant and easy to repair, it only requires minimum maintenance and is easy to clean.**  
**Practically fireproof , as it does not allow fire to spread , it has at the same time low thermal conductivity and therefore high insulative capacity .**  
**Its consistency allows the creation of perfectly seamless joints and the beauty of minimal , lean , beautiful objects to make your everyday life even better.**  
**Thanks to its high Light Reflective Value and equally high Whiteness we find a pure and luminous material inviting to touch and combining Aesthetics and Functionality in a unique way .**  
**Along with our designers and a steadily developing production team we at IDEAVIT are developing products with this versatile material that will stand up to whatever your life may throw at it .**
