

SCULPTURAL towel warmer/radiator

The CINIER Sculptural radiator is made with a 1-1/4" - 3cm thick panel in Olycal stone quarried In the Pyrenées mountains mounted on a powder coated metal frame to allow wall installation. The Olycal stone and the large surface of the CINIER radiators allow the heat output generated by the radiator to radiate in an homogeneous pattern and to remain at a temperature of 95°-113°F/35 to 45°C in normal operation for a higher comfort and safety level with a maximum of 65°C/149°F when the unit is turned on.

These unique characteristics allow the CINIER radiator the most comfortable heating solution available to date. All electrical components used to make the electric version of the CINIER radiator are UL listed. The radiator can also be supplied with a thermostat.

The Sculptural radiator weighs 122 lbs-55 kg.
Projection: Towel bar 3" and towel warmer radiator 3-1/4" from finish wall.
Sculpture projection: 2" from face of towel warmer.
Height 32" / 80cm, width 50" / 127cm.

Standard configuration with 2 towel bars from Dornbracht, the option of towel hooks is also available. Customer can also provide his own towel bars, in such case they are installed at the time of fabrication.

Electric version, 120V for the US and Canada with 900 W-3075 Btu output in the 32"x 50" version. Hydronic version with coil in solid copper embedded in the Olycal stone also available.

Thermostat for hydronic & electric versions:

1 / Hydronic: Oventrop thermostat mounted on the back of the radiator – right of left upon request. See install instructions.

2/ Electric: Honeywell thermostat wall mounted, sold separately Please refer to Honeywell product sheet available upon request.

Hydronic output: 907W - 3100 Btu
Refer to chart of colors for available colors.
5 years manufacturer's warranty.

Made in France by Ateliers Cinier.
