

YACHT towel warmer/radiator

The CINIER Yacht towel warmer radiator is made with a 1-1/4" - 3cm thick panel in Olycal stone quarried in the Pyrenées mountains mounted on powder coated metal frame to allow wall installation. The Olycal stone and the large surface of the CINIER radiators allow the heat output generated by the radiator to radiate in an homogeneous pattern and to remain at a reasonable temperature of 150°F/65°C maximum for a higher comfort and safety level. These unique characteristics allow the CINIER radiator the most comfortable heating solution available to date. All electrical components used to make the electric version of the CINIER radiator are UL listed. The product can be supplied with a thermostat.

Yacht Towel Warmer
72-3/4" / 185cm high
20" / 50cm wide.

The Yacht towel warmer radiator weighs 167 lbs-75kg in the 72-3/4" tall version.
Overall thickness: 3-1/8" – 8 cm.
Height 72-3/4" – 185 cm.
Width: 20" - 50cm.
There are 3 towel bars available attached to the mast available in teak or wenge wood.
Electric version provided with 120V power supply for the US and Canada
1000 W-3410 Btu output in the standard version.

Option thermostat for electric version:
1 /Thermostat mounted in the back of the radiator – right of left upon request.
2/ 24/7 Thermostat wall mounted. Please refer to product tech. sheet.
Option thermostat for hydronic version: Oventrop Thermostat mounted in the back of the radiator, see Install instructions
Energy output: Elec 1000W-3410Btu /Hyd 850 W-2900Btu
Refer to chart of colors for other colors available.
5 years manufacturer's warranty. Made in France by Ateliers Cinier.
