BUCCHERO.

The collection Bucchero was created after various studies and experiments of the skilled hands of our artisans with ecomalta.

The brand Horganica has shown once again its ability to recall nature during the ceramic production process with this line with soft features that characterize two different shapes, round and oval, to meet practical needs and make the bathroom unique.

The search for particular resins embraces the recovery of lost manual skills in a unique product, different from all the others and 100% Made in Italy. Innovative materials are added to the ceramic to create new harmonies and new designs.

Bucchero, the union between tradition and modernity ... not a simple washbasin, but a work of art
